

## **APTA at InnoTrans 2016**

APTA Acting President & CEO Richard White, along with Acting VP for Member Services Randy Clarke and Chief of Staff Petra Mollet, represented APTA at InnoTrans, the largest rail exhibition in the world attracting nearly 145,000 visitors and 3,000 exhibitors from more than 140 countries. White also made a presentation on the challenges and opportunities for public transportation in the U.S. at a joint APTA-UNIFE session organized by UNIFE (Union des Industries Ferroviaires Européennes or Association of the European Rail Industry).

The four-day event in Berlin, Germany, brought together professionals in rail operations and planning, rolling stock manufacturing, rail technology, systems integration, and suppliers of rail parts for both passenger and freight. APTA's delegation gained valuable insights into the latest international trends, met with APTA members catering to international markets, and forged closer connections with APTA partners.
