

RAIL — ROMANIA'S PRESIDENCY: At the first day of the [Rail Pro Summit](#) in Bucharest Tuesday, Philippe Citroën, director general of the European rail manufacturing industry UNIFE, called upon Romania — which will hold the EU presidency in the first half of 2019 — to finalize the implementation of the technical pillar of the Commission's Fourth Railway Package. He also wants to ensure there will be plentiful grants for rail projects in the post-2020 seven-year EU budget, he said, which will likely be signed off under Romania's watch.
